

# the Cruse Scanner

large format, fine-art & textures

Our CRUSE SCANNER is renowned as the world's best large format scanning solution. ArtLab has the only one in South Africa.

The remarkable scanner allows us to capture large format originals at a quality and resolution never before possible.

The 1.5 BILLION pixel (you read right) capture capability, moving flat bed (can take up to 300 kgs) and computer controlled lighting give you a resolution and detail that is quite frankly stunning - capturing every nuance and texture of the original. Work of up to 1.5m can be scanned behind glass even in it's frame!

All prices EXCLUDE VAT and are strictly COD
