### DID YOU KNOW?

ArtLab has the only Cruse Scanner in South Africa.

This amazing scanning device puts us in a different league.

And let's face it - what you put in is what you get out ...

Cruse Scanners have been chosen for some of the world's finest art and archival institutions such as the J. Paul Getty Museum, NASA, the Smithsonian and national archives around the world.

It scans at 1.5 billion pixels (you read right) and can scan originals up to 1.5 meters in length - (larger with tiling) and can scan objects up to 15cm in height which means we can scan your art in it's frame - even behind glass!
